

Log on to **52.10.16.84/Drizzle/** to access the application

On the **homepage**, user will have the option of navigating to the **temperature dashboard** or **rainfall dashboard** by clicking on the image:

Selecting Temperature Option:

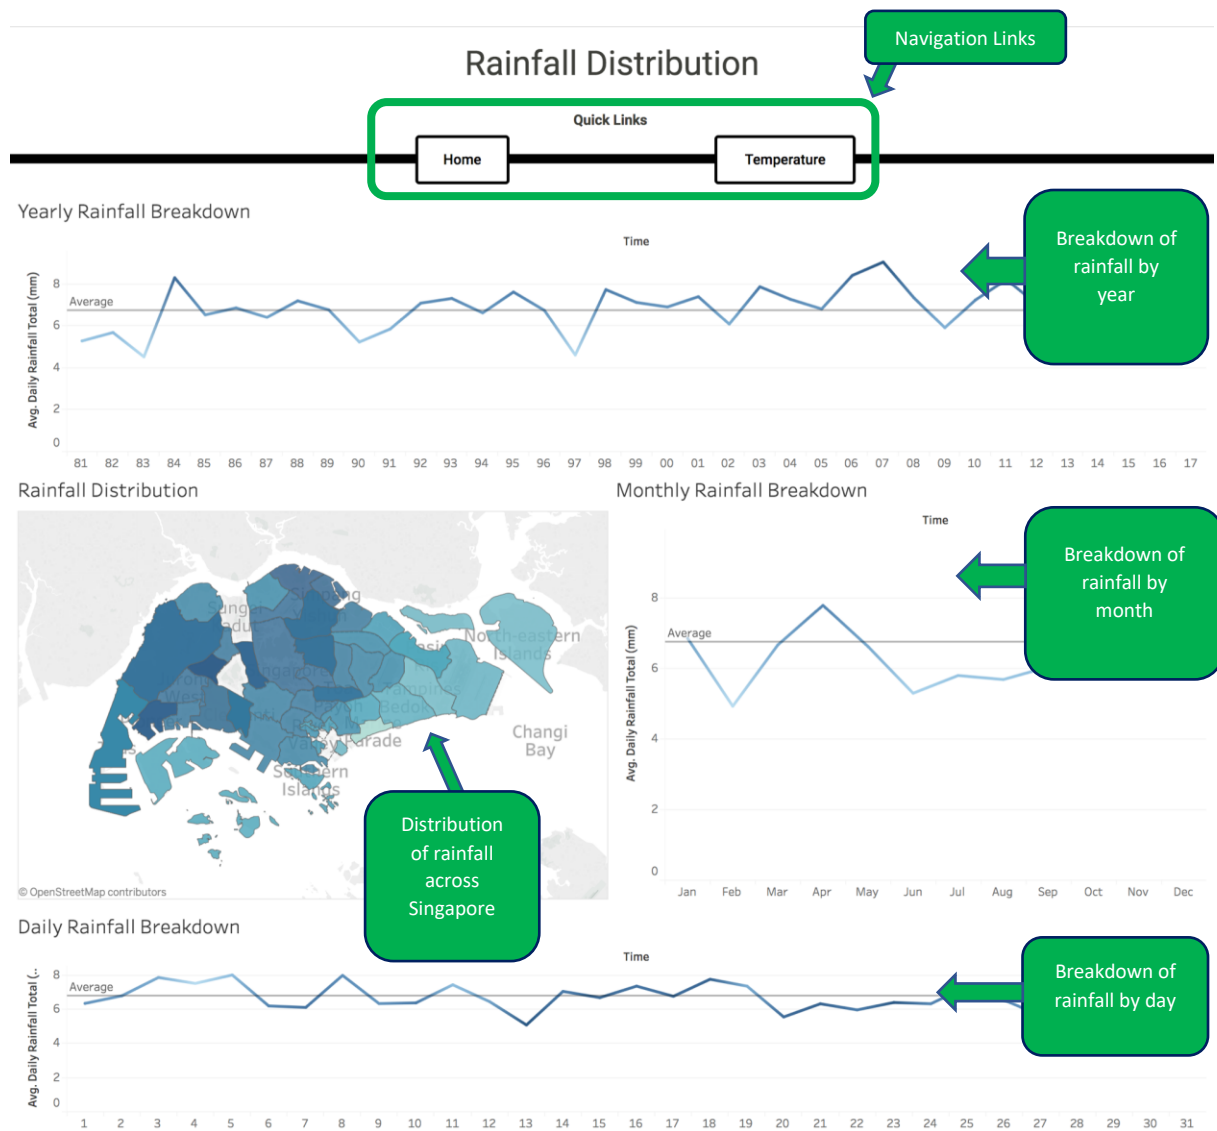

All charts respond to each other, based on the users' selections on any of the 4 charts.

E.g. If a location is selected, the bar graphs will respond to show the temperature breakdown for that specific location.

If there are no records for a specific location or time selected by the user, the charts will not display any values.

Selecting Rainfall Option:

All charts respond to each other, based on the users' selections on any of the 4 charts.

E.g. If a location is selected, the line graphs will respond to show the rainfall breakdown for that specific location.

If there are no records for a specific location or time selected by the user, the charts will not display any values.
