# 1. Setup of Web Application

### 1.1 Pre-Requisites

The following things need to be installed in order to run the project:

- 1. Web Browser (Recommended: Google Chrome)
- 2. Local Server (Recommended: EasyPHP DevServer 14.1 VC9)

### 1.2 Setup

- Copy and paste the "va" folder into the "local web" folder where EasyPHP is installed. The "localweb" folder can be found in the following directory by default: "C:\Program Files (x86)\EasyPHP-DevServer-14.1VC9\data\localweb"
- 2. Run EasyPHP
- 3. Open the web browser and enter the following URL: "http://127.0.0.1/va/index.html"

#### 1.3 Best Experience

- 1. Adjust screen resolution to 1440 x 900, zoom: 75%.
- 2. Use the recommended browser (Google Chrome)

## 2 Homepage

The following page will be shown when the user enters "http://127.0.0.1/va/index.html" in the web browser. The homepage will show the events that might affect COE price and consumer car preferences in Singapore. The user can swipe to the right to see more events that happened over the years.

## 2.1 Navigations

There are five buttons (or links) in the navigation bar which are HOME, OVERVIEW, COE, CPI and CAR MARKET.

# 3 Visualization 1: Overview

These two visualizations show the relationship between private and public transport and its effect on policies. For the first graph, it uses area graph to show the relationship between private and public transport in a month on month growth. For the second graph, it uses bar chart to display the relationship between private and public transport in a year on year growth.

The user can filter the result based on the bidding rounds (display all, bidding round 1 and/or bidding round 2). Besides that, the legend display at the right shows the measure names:

- grey  $\rightarrow$  month on month growth of COE price
- **I** purple  $\rightarrow$  month on month growth on bus
- red  $\rightarrow$  month of month growth on train

The user can hover on the data points to see the corresponding label data and information.

# 4 Visualization 2: COE

These two visualizations show the relationship between car brands and COE price. For the first graph, the user can simply select from the toolbar the car brands they wish to compare and hit the play button to watch it run. Besides that, the user can adjust the size and colour of the bubbles in the first graph by clicking the option button. The user can hover on the data points to see the corresponding label data and information.

For the second graph, the user can click and drag the timeline to see the COE prices based on the specific timing selected by them. Besides, the user can see the COE price trends changes over the time based on different car categories:

- Cat A Cars 1600cc & below, and the engine power should not exceed 97 kilowatts (kW)
- Cat B Cars 1600cc & above, or the engine power output exceeds 97 kilowatts (kW)
- Cat E "Open" (for any kind of vehicles)

# 5 Visualization 3: CPI

Year			Expenditu	-e (55n)	Taxes	(55=) (1
2017			14,000		14,000 -	18
2016 -			12 090 -		12 090 -	
2013			12,000 -		12,000 -	81
2013 -			10,000 -		10,000 -	
2012						61
2011 -			8,000 -		8,000 -	
2009 -			6,000-		6,000 -	
2008 -						4
2007 -			4,080 -		4,000 -	
2005 -			2,000-		2,000 -	21
2004 -						
2003			0 _		0 -	l
Year	Expenditure (S\$m)	Taxes (S\$m)		CPI (%)		
2003	1420	5412		74.30		
2004	2010	5207		75-39		
2005	2044	3645		73.52		
2006	1833	3218		72.33		
2007	1899	4511		74.18		
2008	3746	3479		77.25		
2009	4453	3290		74.86		
2010	4706	4863		82.57		
2011	4467	5779		92.41		
2012	5916	6635		08.05		
2013	6050	5073		101.23		
2017	6096	2972		100.00		
2014	0000	1310		100.00		
2015	11115	10.80.8		90.50		
2016	10439	13747		95.19		
2017	7620	13089		98.45		

CPI CAR MARKET

COE

This visualization provides an overview of the government's expenditure on transport system as a proportion of transport tax in the form of COE. The user can do the brushing at the specific range in the Year axis, Expenditure (S\$m) axis, Taxes (S\$m) axis or CPI (%) axis as show in the picture below and the corresponds data will be shown in the table:

Besides that, the user can hover on the table below to see the corresponding line (highlighted) in parallel coordinates:

## 6 Visualization 4: Car Market

There are 3 visualizations in this page. The user can click on the buttons:  $\blacksquare$   $\blacksquare$  to flip the page.

#### 6.1 The treemap

This visualization allows a user to see the overall car market shares in Singapore from 2012 to 2017. The user can

- click on the play button ► below to see the changes over the time
- they can select a specific year and see the market share distribution for year

	2002	2003	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015	2016	2017
--	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------

• Or they can select a range of years

	2002	2003	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015	2016	2017
--	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------

Besides that, the user can click on the country (e.g Japan) to see the car brands under the country as below:

< Back	Japan		
Toyota	Honda	Mazda	Mitsubishi
109014	IIOnda	Ινιαζαά	
			7 40/
		1 = 0 /	/.4%
		15%	Subaru
		Niccon	Subaru
		INISSan	
2.20/	210/	0.00/	5.1%
52%0	$\mathcal{I}^{0}$	8.3%	Suzuki

Overall Cars Market Share in Singapore
