3.3 Network	6
3.4 Explore: Multiple supplier tenders	Error! Bookmark not defined.
3.5 Explore: Top N suppliers	9
4. Troubleshooting & Support	11
Appendix: Points of Contact	12

1.Introduction

This version 1.0 is the first release and any feedback for improvement may be provided to authors (refer to point of contact).

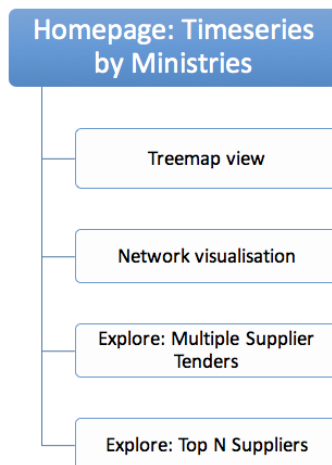

Current user guide aimed to give instruction to application “GeBIZ: Singapore and the Suppliers that make her tick” use, describe features and user interface. User manual is not a subject to any restriction and can be accessed freely.

2. Overview

“GeBIZ: Singapore and the Suppliers that make her tick” is a RShiny-powered web-application build to provide interactive exploratory visualization of Singapore government procurement based on GeBIZ open data license dataset. It’s accessible by pointing web-browser to the address: <https://qiaoxy.shinyapps.io/GeBIZ/>

No browser restriction foreseen, but we recommend to use Goggle Chrome. No registration or login is required.

Figure 1 - Application map

Homepage of the application is timeseries display, using tabs below navigation to Treemap, Network and Exploration function is available.

Table 1 - Glossary and Abbreviations

Term	Acronym	Definition
Government Electronic Business	GeBIZ	Government-to-business (G2B) Public eProcurement business centre
Dashboard	-	Data visualization tool that displays graphs based on selected variables.

Timeseries	-	Series of data points indexed in time order. In current app its total amount of tenders represented as line graph over time.
Treemap	-	Map implementation that keeps its entries sorted according to the natural ordering. In current app the view shows hierarchy based on number of tenders or total dollar amount of procurement.
Facet graph	-	In current app facet graph is a plot into a matrix of panels, showing one tender per plot.
Boxplot	-	The way of representing statistical data on a plot in which a rectangle is drawn to represent the second and third quartiles.

3. Features and Navigation

Figure 2 - Homepage Screen Interface

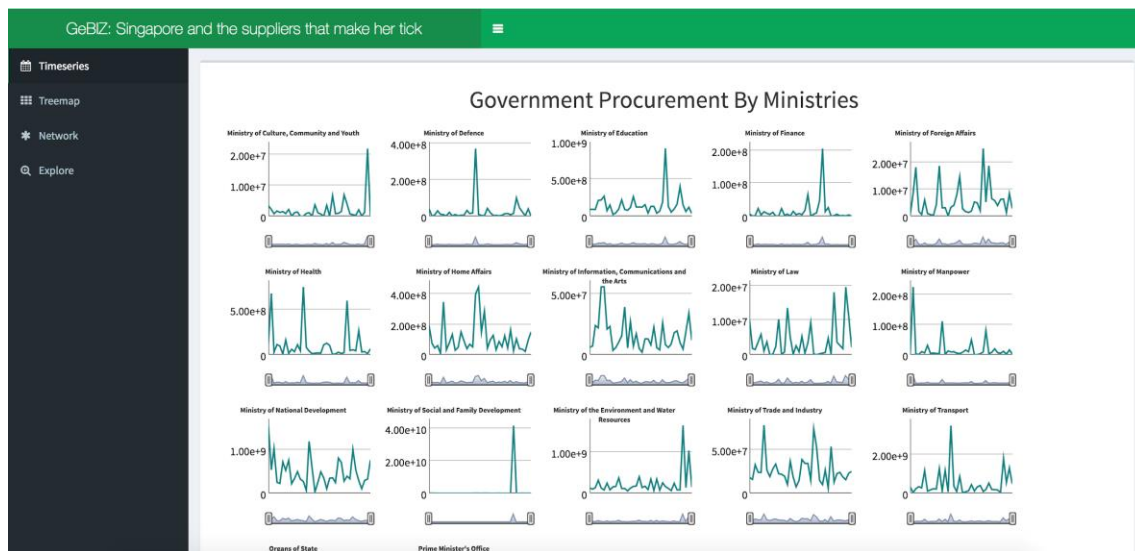

Table 2 - Homepage navigation and controls

Control	Description
	Allocated in header next to application title. Click allows to hide/unhide navigation panel on left to maximize main screen.
	Navigation tab, selected by default. Click to it opens Timeseries screen.
	Navigation tab, not selected by default. Click to it opens Treemap screen.

 Network	Navigation tab, not selected by default. Click to it opens Network screen.
 Explore	Navigation tab, not selected by default. Click to it opens Explore screen, Multiple suppliers tenders section.

3.1 Timeseries

Timeseries main screen allows to observe total amount of procurement by ministries depending on time with a purpose to look for trends, seasonality, comparison in time.

Figure 3 - Timeseries Screen Interface

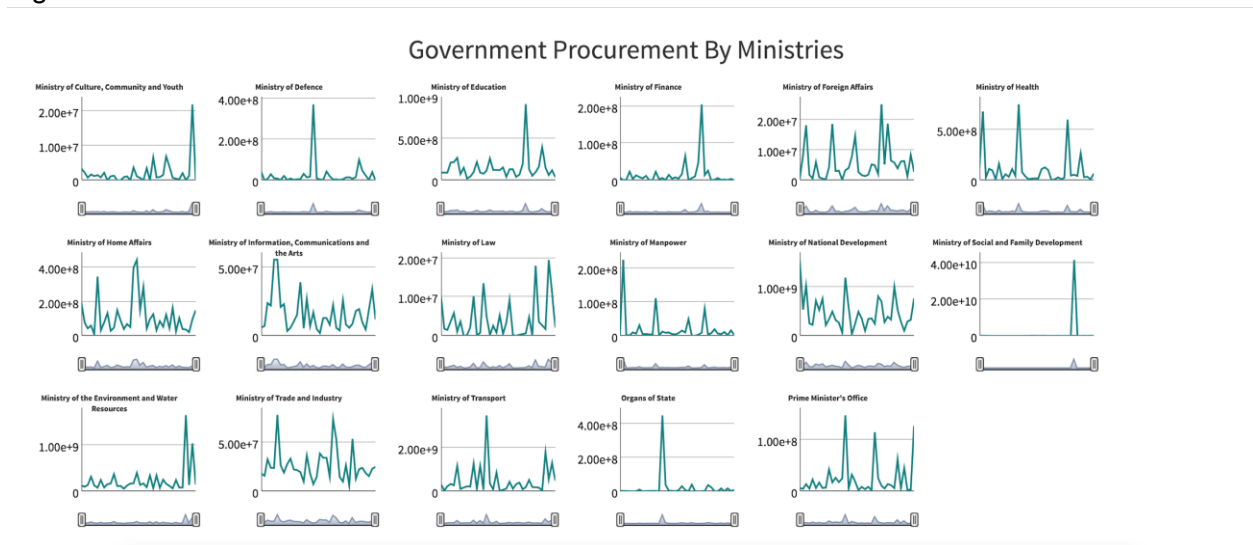

Table 3 - Timeseries navigation and controls

Control	Description
	Time range selection, slider. By default: all three years range is selected. Drag control to change time interval and apply changes to all graphs at the same time.
	Interactive Tooltip will be shown on hover to the point in line graph. Information included: time and overall amount in Singapore dollars.

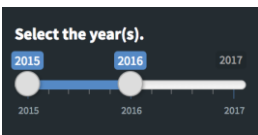

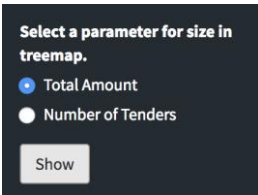

3.2 Treemap

Treemap screen will not represent graph by default. To make it shown please select parameters first using left panel controls and click to Show-button.

Figure 4 - Treemap Screen Interface (part one)

Table 4 - Treemap navigation and controls (part one)

Control	Description
	Selector of years to subset the data. Slider when selected range will include the value shown (for example here 2015 and 2016 are included).
	<p>Selection of area-mapping for treemap: total amount or number of tenders are available to select in radio buttons.</p> <p>Show-button: click to update graph based on new selection.</p>
	On hover to the tile its breakdown structure will come interactively. It also works as a button to navigate to the next layer (refer to part two below).

After click to the ministry tile, part-two screen will be shown - treemap of the agencies of selected ministries. Section below will show distribution of tenders by their dollar amount.

Figure 5 - Treemap Screen Interface (part two)

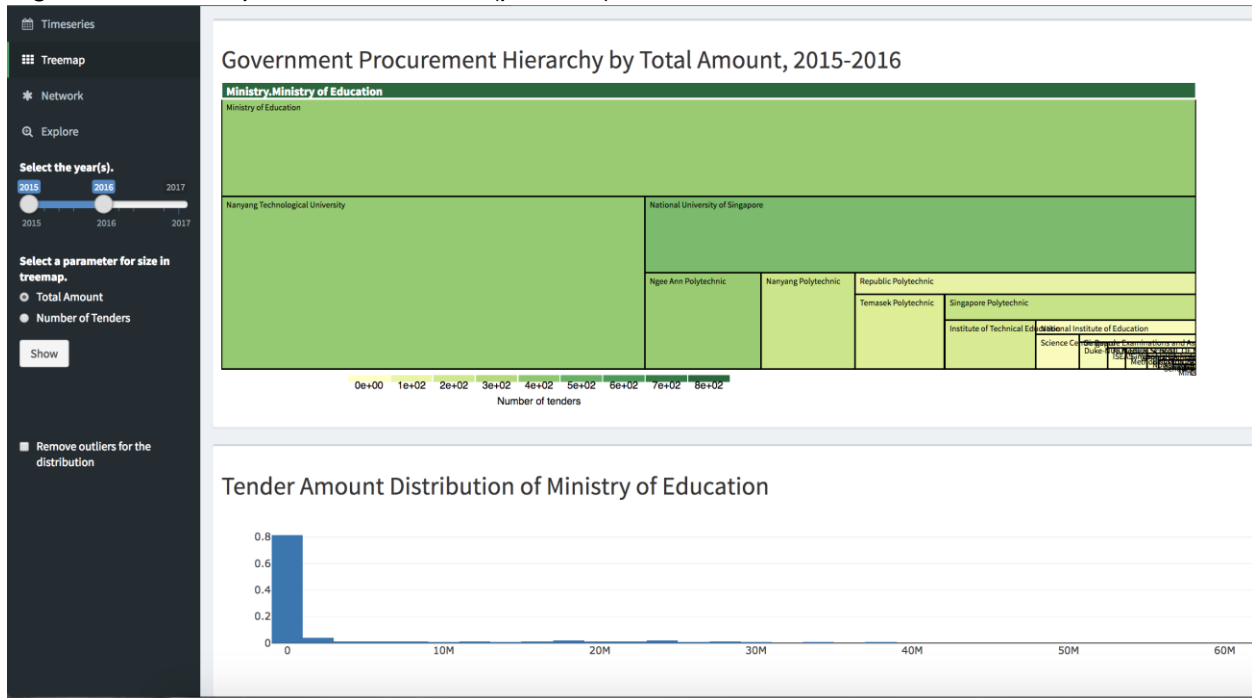

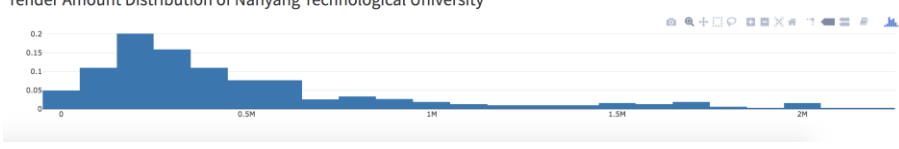

Table 5 - Treemap navigation and controls (part two)

Control	Description
<input type="checkbox"/> Remove outliers for the distribution	Checkbox to remove outliers allows to see the most frequent tenders by amount as show below: Tender Amount Distribution of Nanyang Technological University 

3.3 Network

Network visualization allows to explore connections and relations between agencies and their suppliers, in this network agencies are shown as yellow nodes and suppliers as blue. Arrow states for tender (or tenders) awarded and arrow line thickness is proportional to total amount awarded. Network will be build base on selection parameter on left panel.

Figure 6 - Network Screen Interface (Agencies' Network)

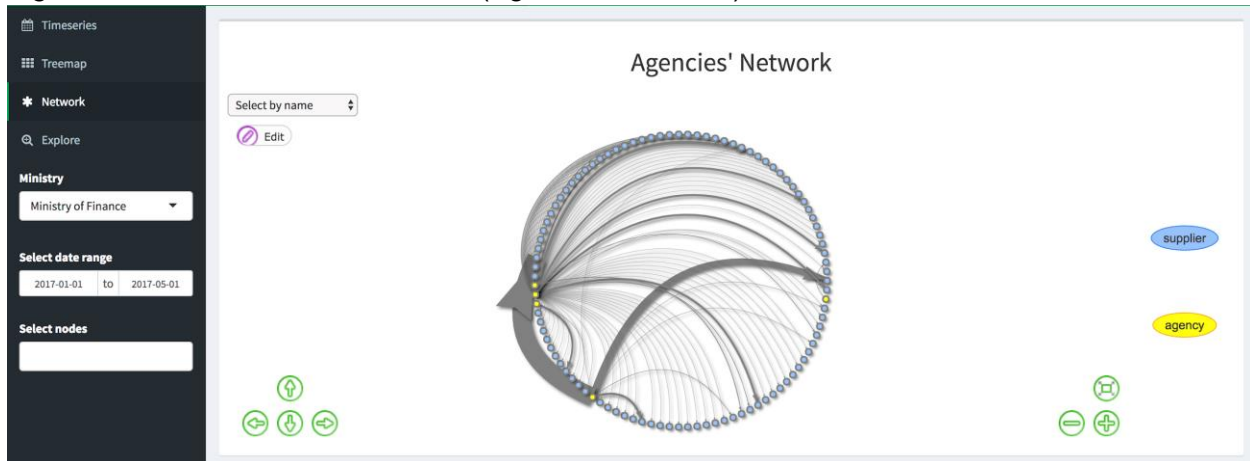

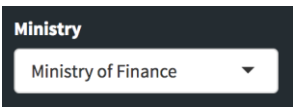

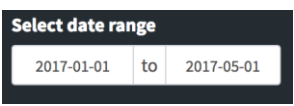

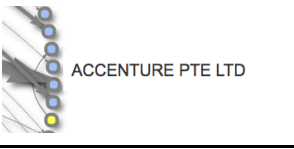

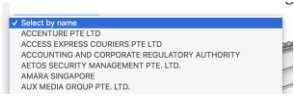

Table 6 - Network navigation and controls (Agencies Network)

Control	Description
	Dropdown to select ministry from predefined list, single-selection. Ministry of Finance is selected by default. Changes applied automatically.
	Date range selection: date pickers for 'from' and 'to' dates to subset the data. Changes applied automatically.
	Nodes representation interactivity: on hover name of the node (agency or supplier) will be shown. Click will highlight the connections of the node.
	Screen regulation: moving to sides, zoom in and out.
	Selection dropdown to highlight the node (agency or supplier).

Second section of the screen is available to search for the nodes and show all the connections of selected node (or nodes) in separate graph.

Figure 7 - Network Screen Interface (Node Selection)

Selection Result

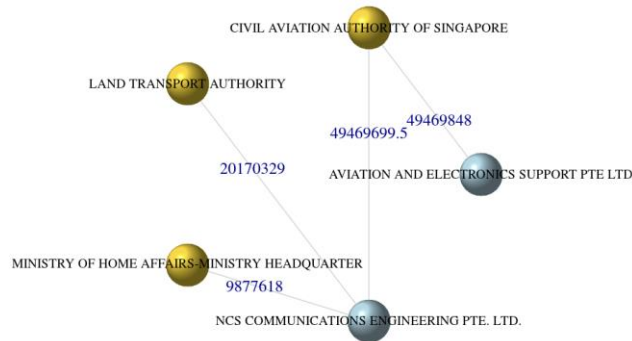

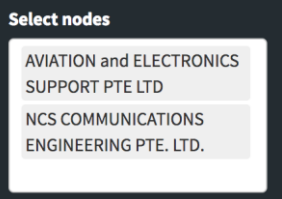

Table 7 - Network navigation and controls (Node Selection)

Control	Description
	<p>Node selection: multiselect dropdown. Result will be updated automatically. Type to start the search, suggestion will be shown. By default, no nodes selected.</p>

3.4 Explore: Multiple supplier tenders

Navigation to the last, Explore tab will open multiple suppliers' tenders search. By selection of ministry and agency we can see all the tenders awarded to more than one supplier in facet graph, where each facet represent one tender.

Figure 8 - Explore: Tenders with multiple suppliers

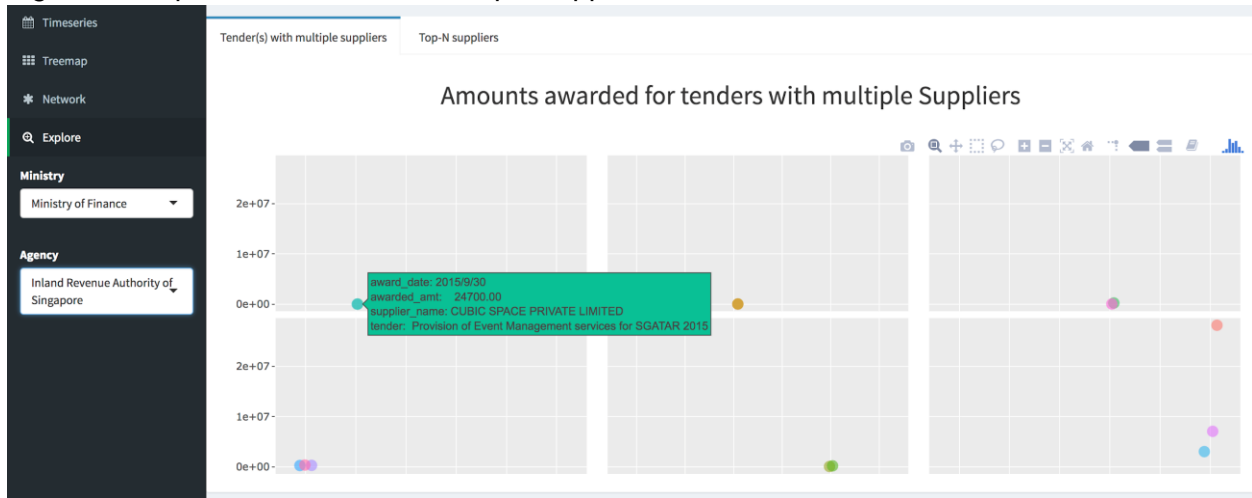

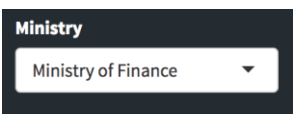

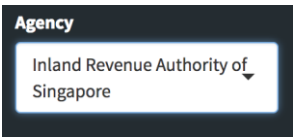

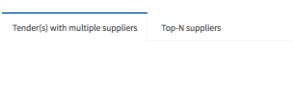

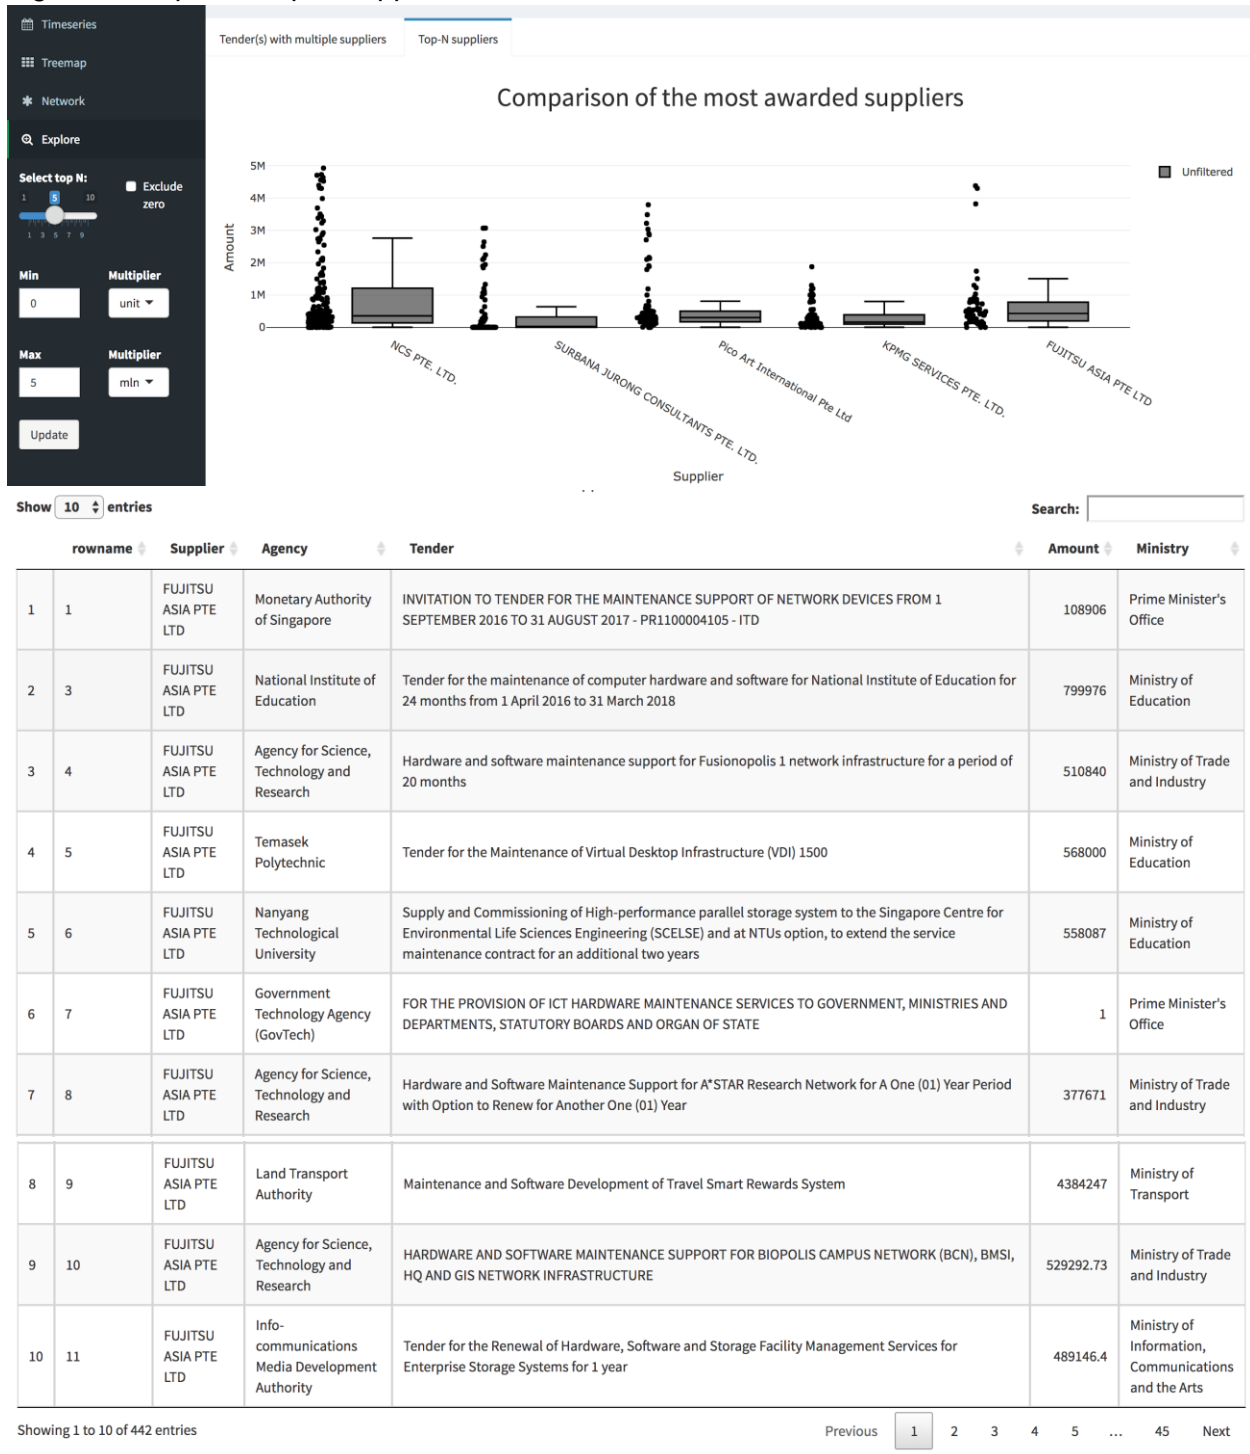

Table 8 - Explore: Tenders with multiple suppliers' navigation and controls

Control	Description
	Single-select dropdown where ministry has to be selected. Default choice is Ministry of finance.
	Single-select dropdown where agency has to be selected. The selection list depends on ministry choice. After selection graph will be updated automatically.
	On hover to each point details of tender part awarded will be displayed: date, amount, supplier, tender description.
	Navigation tabs. Tenders with multiple suppliers is opened by default and highlighted. By click to Top-N suppliers next exploration screen will be opened.

3.5 Explore: Top N suppliers

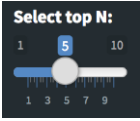

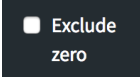

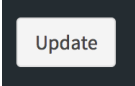

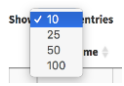

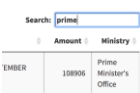

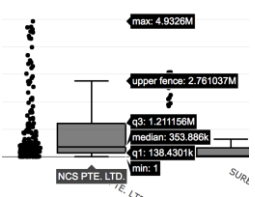

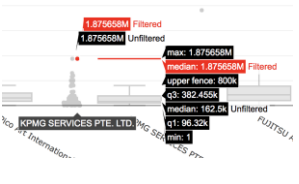

The second exploration tab can be navigated from Tenders with multiple suppliers' screen. By default there will be no data shown, you need to click Update-button so that visualization appears based on selected parameters.

Figure 9 - Explore: Top-N suppliers

To be able access all the information available (dataframe), scroll down is needed.

Table 9 - Explore: Top-N suppliers navigation and control

Control	Description													
	<p>Slider to select how many TOP supplier to show, defaults value is 5 (1 to 10 is available).</p>													
	<p>Checkbox to exclude zero-value (no dollar amount mentioned) tenders from consideration. By default, not selected.</p>													
	<p>Adjustment of the scale: counter of units and selection of multiplier out of unit/thousand/million single-select dropdown.</p>													
	<p>Click to Update-button will refresh the results based on selection applied.</p>													
	<p>Datatable view management: select from dropdown how many entries to show (10 by default).</p>													
	<p>Search through the table: type into text field to filter table based on search criteria.</p>													
	<p>Sorting control: click to arrows to apply ascending or descending sorting based on column selected.</p>													
	<p>Pagination control: navigate to different pages of data table (first is opened by default).</p>													
	<p>On hover to boxplot statistical information will be shown as complex tooltip.</p>													
 <table border="1" data-bbox="521 1570 1414 1654"> <thead> <tr> <th>rowname</th> <th>Supplier</th> <th>Agency</th> <th>Tender</th> <th>Amount</th> <th>Ministry</th> </tr> </thead> <tbody> <tr> <td>88</td> <td>93</td> <td>KPMG SERVICES PTE. LTD.</td> <td>Temasek Polytechnic</td> <td>Tender for the supply, delivery, design, development, testing, implementation and maintenance of Temasek Advanced Learning, Nurturing and Testing Laboratory at Temasek Polytechnic</td> <td>1875658.33</td> <td>Ministry of Education</td> </tr> </tbody> </table>	rowname	Supplier	Agency	Tender	Amount	Ministry	88	93	KPMG SERVICES PTE. 4. Troubleshooting & Support

The application uses single augmented dataset and shouldn't produce errors in case of any kind of alternative use scenarios.

In case of any assistance required, please use the points of contact for correction measures to be taken.
