### **Agenda**

Weekly meetup to update on progress

### **Notes**

This project: Collaboration between IT team and Business team of JNJ  
Moving forward: If they want to include more data at the end of the supply chain, data extraction is needed  
Tableau 10.4  
Data Dictionary for MasterTable  
Pivot Function in Tableau -> Solves the issue of multiple transactions regarding the same material?  
Add Vendor Cty, need to convert all local currency costs to USD  
Next week: Mid-term report (end of Week 8) (integrated database, ER diagram, process of reaching these 2 outputs: data cleaning, transformation, etc.)  
BOM Visualization: Cty -> Plant -> Plant Nty (filter) -> Plant Name  
Need one more column to indicate which BOL level  
Need one more column to indicate who manufactured it

### **Other things to consider**
