

Supervisor Meeting Minutes

Subject: Supervisor Meeting 3
Date: 10-03-2016
Time: 0900
Venue: SIS Meeting Room

Attendees:

- Akshat Agarwal
- Pooja Tulsyan

Meeting Agenda:

- Review of the interim report

Action Items:

- No prototype was submitted for the interim report.
- Upload the codes to the elearn
- Differentiate between lit review and motivation
 - Lit review is extra info on the topic, motivation is what motivates you to do the work (Likert scale data, tend to teach you how to handle continuous data, hardly exposed to categorical data, cannot use conventional statistical methods, want to study is there anything better to analyze Likert scale data)
- No clear idea of the approach or methodology to solve the analysis.
 - Which libraries are you using?
 - Look at the references for the dashboard design papers
 - Iterate through several designs
 - Add application architecture to the report
 - Why do need MySQL or Java? Keep data in a file or spreadsheet. Try SQLite. Data is very small, MySQL might not be needed. Flat file should be able to handle most of the things.
- Add page number to the report
- Refer from Geospatial project from last year's term 2 project
- Try finding a way to link the divergent graph to parallel sets
- Service gap analysis can be determined clearly by looking at the graphs that are already there
- Make a pair of divergent and parallel sets for both importance and satisfaction
- You can dynamically filter the charts by selecting categories from a demographics chart
