Agenda Items

1. Went through Spatialite

- Established database
- Figure out how to run SQL query to call buffer and find points within
- But this method still requires a php server, which the client has to install

2. Do up Information product to show Isaac

- Unsure about how KPI is calculated, need to ask Isaac
- Recommends classifying flats into high, moderate and low risks, and generate a heat up based on it

Action Items

1. Figure out buffer SQL query on spatialite (**Everyone**)
