Agenda
1. **Questions on R Model**

No.	Discussion:	Action by:	Deadline:
1	**Findings from JMP**		
	- If the OR operator is chosen, Triple Science students will always get lower L1R4/L1R5 scores which doesn't make sense - The criteria from the school to place students into different streams is not strict enough - Suggested to use python to do coloured boxplots to differentiate between subjects but was not recommended as there is no ordinal difference between the subjects		
2	**Work Allocation**		
	- Focus on tableplot on R - Focus on user guide and explanation of how to interpret the diagrams - Focus on literature review of the conference papers to explain what we are doing better	Edufy	3 Apr 2017 (Monday)
