# Meeting #9 Minutes – Analytics Practicum

**Date:** 31 Mar 2016

**Time:** 1:30PM

## Attendance

*Present*

Tan Wei Liang

Tan Yu Ling

Melissa Lim

## Agenda Items

1. **Internet browser**
   - Engage client to use chrome at the bare minimum
   - Communicate that modern web browser has to be used for our project

2. **Displays for selecting layers and distance in KPI dropdown list**
   - Give users the option of a dropdown list to select the layers from, before inputting distance
   - Instead of current design, where all the layers are already displayed

3. **Excel results downloaded**
   - Add in number of amenities surrounding the HDB block in the excel file available for download
   - Add in the risk level of the HDB block as well
   - Something to consider in the future: Risk level can be calculated using a composite figure instead

4. **Presentation of layers in differentiated colors according to risk level**
   - Include more info about why that HDB block is high/low risk in pop-up

5. **Conference Paper**
   - Reformat, no need double columns
   - Include system architecture diagram

**6. Other updates**

- Try to use leaflet API to query postal code instead of Google Map API
- Look into ways to allow user to upload layers
