

Date	Tuesday, 06/02/2018
Time	13:00 – 17:00
Venue	LKS Lib proj. 4-14
Attendees	Tan Yongjin, Wu Wei, Wang Miaoqiong
Agenda	Connect powerBI to MSSQL database

S/ N	Item Discussed	Remarks
1	Connect powerBI with MSSQL database	<p>In the last meeting, we have completed database construction and successfully load all data into MSSQL.</p> <p>In today's meeting, we mainly focus on establish connection between powerBI and MSSQL.</p> <p>We successfully set up connection for them. However, we faced the capacity issue in powerBI. When we connect to database and load it in powerBI, it showed error 'There's not enough memory to complete this operation'. From our research, we found that the maximum data capacities for powerBI is 10 GB only, our existing database exceed the limitation.</p> <p>We decided to reconstruct the database and load part of data (one quarter) into powerBI. We aim to complete this task by today and move on to report generation this Friday.</p>
