

<b>Date</b>	Friday, 09/03/2018
<b>Time</b>	11:00 – 18:00
<b>Venue</b>	LKS Lib proj. 4-14
<b>Attendees</b>	Tan Yong jin, Wu Wei, Wang Miaoqiong
<b>Agenda</b>	<ol style="list-style-type: none"> <li><b>1. Rectify incorrect results of output3 and complete the output3</b></li> <li><b>2. Consolidate all outputs (output0-output3)</b></li> <li><b>3. Explore dynamic report title</b></li> </ol>

S/N	Item Discussed	Remarks
<b>1</b>	<b>Rectify mismatch results of output3 and complete the output3</b>	<p>In this meeting, we mainly focus on rectifying incorrect results of output3. We changed the join condition, instead of using AWB, shipperaccount, orig_fac_id, we used AWB and date difference between recordMonth and startclock_day. By using the new query, the results are more closed to model report.</p> <p>Person in charge: Wu Wei, Wang Miaoqiong</p>
<b>2</b>	<b>Consolidate all outputs (output0-output3)</b>	<p>After finishing output3, we consolidated them together as one completed report.</p> <p>Person in charge: Tan Yong Jin</p>
<b>3</b>	<b>Explore dynamic report title</b>	<p>As suggested by Prof. Kam, we need to give a clear title for each report, so that users can know what the content is at a glance. In this meeting, we also explored how to add dynamic report title.</p> <p>Person in charge: Wang Miaoqiong</p>
