

Meeting Minutes 3

Date: 8 September 2017

Attendees: Lam You Kang, Yong Li Ru Cheryl, Tan Yong Ying

Agenda

Weekly meetup to update on progress

Notes

We need to figure out how to automatically indicate the parent/child relationship in BOM. If automation of such indication is difficult, we may even have to suggest a different way of extracting information by batches.

Even if we indicate the parent of a child, how will we link all the children back to BOL 1 material?

For Thailand file, we can match BOL 1 costs to BOL level 2 costs. But for materials with > 2 levels, cost mapping is difficult due to duplicate rows.

Meaning of exercise: To look for inconsistencies.

Cheryl: China

Joanne: Phillipines

Youkang: India

Other group: Thailand

Friday 1.30pm to 3pm: Internal SMU discussion

Other things to consider
