

ANLY482 Internal MEETING MINUTES (24 Feb 2018)

Date:	24 Feb 2018
Time:	15:30 – 18:30
Venue:	Library Proj.Rm 4.7
Attendees:	Team: Ruiyan, Qian, Nicholas
Agenda:	<ol style="list-style-type: none"> 1. Understand project requirement 2. Understand YUN.EDU2018-ImpactFactor_v2.0 3. Question

S/N	Things Discussed/Done	Remark
1	Understand project requirement	<ul style="list-style-type: none"> • Discuss project requirement together
2	Understand YUN.EDU2018-ImpactFactor_v2.0	<ul style="list-style-type: none"> • The Chinese character in the data is not displayed correctly. • According to the data introduction, there should be 6 columns in “td_np_cell_area.csv”. However, there are only 5 columns in the actual csv. The “cell_name” column is missing. • According to the data introduction, there should be 6 columns in “td_np_area_rela.csv”. However, there are only 4 column names insides. • According to the data introduction, there should be 4 columns in “td_np_dpi_app”. However, there is an additional “data_type” column. • There is no description for “cell_flag”, “call_type” and “roam_type” in “TM_GSM_CELL_SUM_DAY_YYYYMMDD”. So we do not know the meaning of data input (0,1,9). • Come up with assumptions about the data

3	Questions	<ul style="list-style-type: none">• Can one cell ID uniquely identify a base station cell?

Item Due (Team) / Actions
Deadline: Feb 25 <ol style="list-style-type: none">1. Identify data problems in each csv2. Think about the relationships between different data files
