

**Time: 11.15am – 12.30pm**

**Location: Prof Kar Way's Office**

**Attended By: Janice, Siong Min, Hui Shia, Prof Kar Way, Ms Michelle,**

**Absent with Apologies: Nil**

No	Agenda:	Action By:
1	Hui Shia explained the feedback that we got from our meeting with Kam (the 3 outcomes).	
2	KW: Geospatial clustering - out of 8 countries, maybe majority of them show that there are more sustainability jobs nearer to the coastal line. → Why?	
3	Discussion about daily jobs data:  - Macroeconomic index of London, US: find if there are any trends about green employment.  - Greendex: ability of the consumer to do sth on their own and how they affect the job market	
4	KW is okay if there is a matching dataset. But due to the time difference (different years) in the data, it might be difficult.	
5	Options: <ol style="list-style-type: none"> <li>1. Drop sponsor</li> <li>2. Ocean Freight data if we want to use GTL again <ol style="list-style-type: none"> <li>a. Identify which are the potential trade lanes that can be converted to LCL (LCL profit margin is higher)</li> <li>b. What strategies we can implement for each trade lanes</li> <li>c. Is customers finding it hard to manage high volume?</li> </ol> </li> <li>3. Try out a few directions of what we wanted in the first place</li> </ol>
