Prof Meeting Minutes # 8

Date/Time	23rd March 2017, 10am to 11am
Venue	School of Information System, Meeting Room 4.3
Attendees	Aishwarya Agarwal, Nasrullah Bin Khairullah and Zoey Loh
Agenda	Update Prof on finding a solution for the postal code problem

S/N	Notes/Task	Actor	Follow up Action
1.	Based on the last consult, we created a geodistance for each patient's residential pin code to the clinics. We calculated the latitude and longitude for each pin location. We created zones for each patient's location from the hospitals. Prof suggested us to isolate and filter patients based on the clinics they go to, so that there is no overlap. Showed Prof the latitude and longitude formula Zoey found. But we need to convert it into grid circle , because we need to convert it to metres/kilometres for Singapore. Prof told us the way to do that.	Nas	To convert latitudes and longitudes into distance
