

Date	Friday, 16/03/2018
Time	10:30 – 17:00
Venue	LKS Lib proj. 4-14
Attendees	Tan Yong jin, Wu Wei, Wang Miaoqiong
Agenda	Working on phrase 2 <ul style="list-style-type: none"> - Complete aggregated exception breakdown by year, month - Working on geospatial analysis - Enhance dashboarding features

S/N	Item Discussed	Remarks
1	Complete aggregated exceptions breakdown by year, month	As suggested by project sponsor, we aggregated number of exceptions by month, year. We used line chart to show the trends of exceptions.
2	Working on geospatial analysis	<p>This part of analysis contains following task:</p> <ul style="list-style-type: none"> - Extracting orig_ctry from OPMS data by updating customized select query. - Build map in Power BI. <p>Currently, we are trying to create map in Power BI by using orig_ctry, but we face some issues. The map doesn't show up properly. Column orig_ctry needs extra mapping to map country code to recognizable code that can be understand by Power BI</p>
3	Enhance dashboarding features	We created extra dashboard page to show brief preview of whole report. In this page, users can know some important figures at a glance. Such as counts of Native ODD by category, counts of AWB by year, month.
