

Supervisor Meeting 7

Date & Time: 22 Feb 10:30am - 11:00am

Venue: SIS Meeting Rm 5-1

Attendees: Prof. Kam Tin Seong (Supervisor), Prakash Chandra Sukhwai(Instructor), Wang Sijia, Ren Mengxi, Wang Tianjing

Absentees: Null

Agenda:

1. Interim Presentation
2. Consult Prof about the Wiki contents

Details:

Comments on interim presentation:

1. Use bullet point for introduction slides
2. For academic year column, use formula instead of recoding.
3. Page 30: we cannot suggest the closing time solely based on the entry, as we do not know how many people are still staying in library. The closing time should depends on the occupancy rate.
4. Page 35: Do more analysis on visit level (different schools, years, etc)
5. Page 37 and 38 is not related
6. Page 40 Better use mosaic plot instead of bar chart for analysis, as bar chart cannot reveal the full picture.
7. Page 42: Currently all analysis is at descriptive level. When mean and median is not very close, there is variation. We should do a confirmative analysis by using statistical test(eg. ANOVA test) to see whether it is conclusive or not.
8. Conclusion: Do not leave out the variation part.

Action Plan:

Item	Person in charge	Deadline
Interim Report	All	Feb 26
Model Refinement	Sijia	Mar 01
Explore on web application	Mengxi	Mar 01
