

Meeting Minutes 10

Date: 22 November 2017

Attendees: Lam You Kang, Yong Li Ru Cheryl, Desmond Lin, Gao Shuang, Nhu Y and others

Agenda

Weekly meetup to update on progress

Notes

Look into converting Raw and Pack into Cost per Litre in the dashboard
The freight incurred to transport raw materials to Thailand 240A is very high. It could be because the location of raw material manufacturers in TH are faraway?
O/H dir fix is an absolute amount incurred, regardless of production volume
Different sheet for DC costs with variant factor

Other things to consider
