Notes	<ul style="list-style-type: none">- Prof Kam ask us to screenshot the excel file portion where we have questions and send it to JnJ (i.e. CK) so that they are able to answer our questions.- Advised us to reorganise the different excel tables to make sense of it<ul style="list-style-type: none">o Rearrange and list which items is under the same Materials. So reorganize the data according to which items fall under the same material no. Eg. All the 21961260 ingredients and cost are properly differentiated and separated.o Once we clean up the data then do visualisation and analysis part. Look at cost at production side and cost at DC side.
