IS480 - Final Year Project

Singapore Management University

Date   :   September 17, 2014

Location   :   BP Meeting Room

Subject   :   Clarification and Demo

Attendee   :   Pujara Aniket Pinakin, Gokarn Ila Nitin, Mi Mi Han Kyaw, Siddhant Kanaujia,

Phyu Phyu Htant, Peter Morrison, Terence Tan Yeow Khin

Absentee   :   None

Main progress
- checkpoints and transactions
- Super Admin Module
- Take quiz

Clarification

Schedule the publish and recall of modules	Approved
Hint for the quiz questions but should be an optional input	Approved
Save a local copy of the quiz for the trainer	Rejected
Give an upper limit to number of attempts	Rejected
Re take the quiz without going through the module	Approved
Remove the timer feature after first quiz attempt for 24 hrs	Approved
Users can be in multiple user groups	--
Checkpoint should have hint for right and wrong answer	Approved

Demo
- Layout of View Module has been appreciated and approved
- Bug in Edit Module when adding new checkpoint (Question field is disabled)
- The display of navigation arrows has been approved
- Option to submit the new checkpoint needs to be changed from a checkbox to a submit button
- The checkpoint feature is okay, but it's display can be enhanced

Super Admin Module
- Add Username, and User First Name and Last Name for Users
- Change UserGroup Department to Description
- Super Admin Incomplete (File Upload)
- Display all UserGroups as a list to edit or delete them
- Username should not be changeable

Project Management
Issue with scheduling and allocating time
Current status: Lag of approximately 3 days
Integration of all functions is not complete
Phyu needs to create a project management report which should be presented next time, keeping track of the risks and schedule progress

<u>Virtual Testing Environment</u>
- Credential Email will be sent to CG and Siddhant
- 90 days expiry for the login name and password

Should the modules be under separate categories and sub-categories?
Basic and advance (Are there three levels?)

UI should be consistent with tabs (For what?)

Layout of CSV
UserGroup: Usergroup Name | Description
User: Username | First Name | Last Name | Role | UserGroup(s)

For client user testing on 30th September
Tatang Hendrolukito will be replaced by Derek Gooh, high level officer

H drive should be our home drive and where we put server (for virtual testing)

30 people assign to the module, 4 people at a time will be access the system

Suggestions for the module and presentation
Should be careful when proposing changes
        Changes hereon should be small modifications and not major schema changes

There should be a Timestamp for quiz attempts to store multiple quiz attempts

Get username on Chrome also (User Authentication)

We should have test plan before next meeting (PP)

Research needs to be done for the loading issue (Clarify)
