

Team One Piece

Date : 05/27/2014
Location : SIS MR 3.6
Subject : Meeting with Supervisor
Attendee : Aniket, Ila (Skype session), Mi Mi, CG, Siddhant, Phyu Phyu
Absentee : None

Agenda:

1. Discussion of Wiki with Supervisor
2. Discussion of Progress with Supervisor
3. Discuss X-Factor with Supervisor

Discussion:

1. Wiki is one of the best wikis
2. Current progress is good
3. Great target. Best team can only get A+
4. Different applications can be used in different contexts but the main X-Factor for us is that one feature which is making people stay on each slide and force them to read the slide content
5. Later we can optimize the X-Factor
6. Can put X-Factor in Wiki
7. Deployment cannot be an X-Factor
8. If we have pre-deployed the application to BP and it is being used by BP before our presentation then it gives us really good points for the deployment aspect of the requirements
9. 1st and 2nd are technically challenging so we need to put in the technically challenging part
10. 3rd and 4th are great for X-Factors
11. Demo – Good
12. Whatever you're doing is fine but if there is anything that is particularly challenging and an enhancement compared to current product then you have to specify that to Prof Ben Gan
13. Client's happiness is significantly important. If client is happy then professors have to be happy
14. Discuss later what the client requirements are completely. If client requirements are relatively less, then even if we satisfy the requirements we won't get A+. Reward/Risk
15. We can add features after the Acceptance also. Changes and enhancement are also a criteria
16. Can read slides in app don't need to download
17. Don't mention that our project is simple in anyway
18. Four functions that BG mentioned, put it before Acceptance
19. Email BG and clarify the requirements that he has given before acceptance

20. We should have an understanding regarding the simplicity of the project we're working on
21. Courses, if we're comfortable then he's comfortable
