DISCUSSION

No.	Details
1.	<p><u>To Work on the Proposal</u></p> <ul style="list-style-type: none"> - Proposal Project Overview is done but require vetting <ul style="list-style-type: none"> o Project Description <p>Can.One is building an e-commerce web application that allows users to create a 3-D avatar from a 2-D photograph. This allow a new generation of shopping experience where users can visualize and try on various hairstyles and apparels. With the implementation of the metro design we wish to enhance the online shopping experience. Web application will be designed with touch gesture in mind thus it is optimized for mobile devices. This web application will also allow the users to interact with one another. The web application can also analyze the users' facial features and preferences so that it can recommend products.</p> o Project Motivation <p>The current online shopping experience does not allow the full visualization of user's appearance with the apparels, with the e-commerce web application. This platform will also allow the users to match apparels that are suitable for the users' facial features. Additionally, this web application will recommend items that the users will like. With the sleek metro design, we hope to reduce the complicated design that is common for online shopping website.</p> o Stakeholders <p>Client and Stakeholder for this project is the same</p> o Deliverables o Scope (has not been touched yet) <p>Project Plan has not been touched yet, need to discuss over again to come out with Gantt Chart</p>
2.	<p><u>Brainstorm Team Name</u></p> <p>Retailogy CodeFu Katana or Murasama</p>
