

Date: 2/10/2015
Time: 1200 - 1330
Venue: Plaza Singapura Starbucks

Attendees: Gauri Bhatnagar
 Lim Xin Yi
 Sin Xin Yee
 Tay Guang Wen
 Yap Wei Heng
 Wilson Ang
 John Paul Po

Agenda: 1. Clarifying details with John Paul

	Task/ Description	Person-in-charge	Due Date
1	<p>We came up with the following questions to ask John Paul and Wilson and they gave us the following answers:</p> <p>Ques 1: For the 'Social' page on the Web App, will the user be able to see his/her own tweets or will they be able to see the tweets of their friend's? Ans: - The 'Social' page will just grab any tweet from any user using the hashtag. - The diamonds are supposed to be changed into circles. - We can find a way to display the tweets nicely, instead of just displaying them in circles.</p> <p>Ques 2: Is the current display of the web app going to be fixed or are we able to make changes to it? Ans: - We can feel free to make changes to the display, but we are encouraged to use the circles. - However, as long as we have a way to display information that would bring the message across, it would be good enough.</p> <p>Ques 3: What is supposed to show under the "Updates" page? Ans: - We should be able to see the latest updates/activity of the people (with timestamp) - We should also be able to click on the updates of the people so that a pop-up showing a non-detailed profile of the person can appear. - It is basically a newsfeed showing the latest activities of the people.</p> <p>Ques 4: Where do we get the codes for the</p>	ALL	

	<p>current web app?</p> <ul style="list-style-type: none"> - We can download FileZilla and extract the files from there. - We can get the login details from the Trello page in order to connect to the server. - The System will be under the applications folder. - Most of the codes will be under "Controller" (backend) - "Views" contains the codes relevant to the UI. - "Config" contains all the configurations for the database etc. - "Models" will contain the classes - "UserModels" will contain the getter, setter methods. <p>Ques 5: FaceBook login?</p> <p>Ans:</p> <ul style="list-style-type: none"> - If a user login with a Facebook account, they should not be able to register and create a new account with the same email address that is used for their Facebook account - It would be preferable if they can use social media to log in. <p>Ques 6: Besides the newsfeed, what else do we need to add on to the site?</p> <p>Ans:</p> <ul style="list-style-type: none"> - For the newsfeed, it will show updates about the organization. 		
2	After discussing with John Paul, we realized that it might be better for us to redesign the database as the current database is a bit of a mess right now. As a result, we may have to make changes to the timeline to include a new module.	ALL	15/10/2015
3	For the statistics page, we can include: <ul style="list-style-type: none"> - A summary of all the accumulated efforts so far by all users (since the beginning). - A summary of the accumulated efforts so far by all users (in this month). - A scoreboard to showcase the users with the greatest effort. 	ALL	
4	With regards to the calculation of points, the formulas are all already fixed and they are hardcoded. However, the scores can still be changed on the admin's end.	ALL	
5	Adding documentation inside the codes would be a cherry on top, but that is only if we have the time to do so.	Wilson	
6	The framework that was being used by the web app developers before John Paul is codeignitor.	John Paul	

The meeting was adjourned at 1330 hrs. These minutes will be circulated and adopted if there are no amendments reported in the next 24 hours.
