

**Final Year Project
Meeting Minutes**

Meeting Information	
Date:	06 th June 2014
Time:	0900
Venue:	Singapore Management University

Attendees:	<ol style="list-style-type: none"> 1. Jong Hyeok Lee 2. Benjamin Chan 3. Joel Woo 4. Lavinia Tay
Absentees:	NIL
Meeting Agenda:	<ol style="list-style-type: none"> 1. Update the client, Mr Low Chin Chau on the team's progress 2. Discuss on server deployment, SMS verification services, and iOS 8 CoreLocation service

Task Assignment		
1.	Jong Hyeok, Lavinia	Deployment of web server will be explored by the team. As of this meeting, the client and the team prefer adopting Heroku, so this will most likely be our choice for the deployment server. PostGresSQL will also be used over MySQL due to this change.
2.	Benjamin	Client expressed interest in experimenting on iOS 8 CoreLocation service; but understanding the team's tight schedule, agreed that we can fall back on the current implementation.
3.	Team	Updated client on change in system architecture. We decided to adopt what the client suggested in the previous meeting: REST server will not be separated from web app, and the web app will provide the service to serve the iOS counterpart of the system
4.	Jong Hyeok, Lavinia	Client was informed about the lower response time we are getting from the SMS verification service for our registration module, and he suggested looking at other alternatives if need be. We also updated the client that we have since decided to adopt his suggestion of using existing more robust authentication framework instead of our own implementation.
5.	Joel	Client was informed that a requirement document will be prepared and the team is targeting for the client to sign on the document by the next meeting.

The meeting was adjourned at 1100. These minutes will be circulated and adopted if there are no amendments reported in the next three days.

Prepared by,
Joel Woo
