Team One Piece

Date: 18/10/2014
Location: SIS GSR 3.1
Subject: Supervisor Meeting (Demo & Midterm Preparation)
Attendee(s): Prof Kim, Aniket, Ila, Chenguang, Mi Mi, Siddhant, Phyu Phyu
Absentee(s): None

AGENDA
Post midterm review

- ➢ Make a strategy on how to make the project better than other competitors
- ➢ Will only ask questions based on the **first reviewer's credit/debit**
- ➢ What makes team X better than us?
- ➢ Need to have strong visuals in the project
- ➢ Did not have many clarifications (one clarification causes a reduction in mark possibly)
- ➢ **Need to make our own identity**: what is the strengths of our systems
- ➢ Focus on Jason's feedback (refer to pt 2) -> trainees might want to skip the slides without timer after taking the module once
- ➢ Our system involves editing tools (this is our identity). #Just to show that we have developed some complicated stuff. Also include keywords to make them think about the system even further #beatTeamExcellence (probably faster than actual powerpoint)
  - Even if it is not as strong as powerpoint, we need to show some sort of advantages and strengths
- ➢ If people download our editor then that will give us extra credit
- ➢ Two more UATs: discuss with prof the design of UAT
- ➢ Clarity in presentation is of paramount importance
- ➢ Visual elements make things look complex
- ➢ Two weeks beore the final presentation Prof Kim checks the wiki. Must be final
- ➢ Stakeholder managemnet and learning outcomes are more of an arrow shot in the dark
- ➢ Sponsor must back us in times of strife
- ➢ Need to show 2-3 new functions in the final presentation
- ➢ 7th nov - 17th nov Prof is out of Singapore
- ➢ Did you use the same questionnaire in midterm and final? What is the purpose of UAT? If the purpose is the same then you must have similar/same test cases.
- ➢ Meetings need not be weekly from now on. Biweekly is fine enough
- ➢ Show quantitative results of hibernate vs normal jdbc calls
- ➢ Some teams have number of downloads and live deployment as their x factor. Why don't we do that plus our own x factor? so have a double edged sword against other swords.
