

Client Meeting No.1

Date: 13 September 2014 (Saturday)
Time: 12:00PM – 5:30PM
Venue: SOB GSR 3-1

Members

In Attendance: Brindha Menon
Khiew Shi Kai
Tan Gui Shi
Max Xu Meng Xiang (Sponsor)
Spencer (Sponsor)

Absent with Apologies: Chua Min Xuan
Hye Ri
Hakam

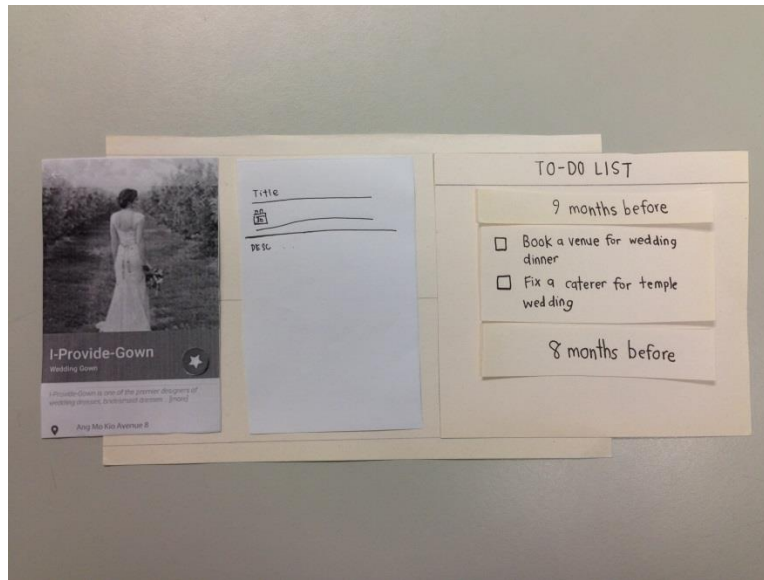

Minutes Recorded By: Brindha Menon

Agenda

Task	Remarks
1. Discuss tasks to be done before acceptance	

Discussed

- 1) Main 3 cards for acceptance;
 - a. Mini handbook for tips and note-taking
 - b. One-liner to-dos
 - c. Discover (top 10 handpicked lists for each category)

More in Dropbox: \Marreo (FYP)\Prototyping\12 sept prototypes

- 2) Try not to go so deep for functionalities (that's what standalone apps have perfected, have the big picture in mind – HOW DO WE PLAN A WEDDING WITH OUR FUNCTION)
- 3) Most important thing that will make our app stand out is the CONTENT; for example help people PLAN their budget, not just record it, help them prepopulate tasks for to-dos and not let them add it (let them DELETE what they do not need)
- 4) Developers, please come up with technical diagrams for each feature before ya'all start coding – data structure, MVC classes and all, class diagrams, filter by what methods (keep it consistent across cards in the event that you need to cross reference between cards), variable names it can be accessed by and whether the variables are private or public etc.

- 5) From Max – Do not let them choose the categories and colours. Fix it. And Gui Shi suggested to follow the one she showed us on the Wally budget app, and have it implemented throughout the app, in the to-do part, discover part and in notes (as tags, see the corner coloured highlights in the pic on the right below).
