

Team One Piece Agenda

Date : 10/10/2014
Location : Skype Session
Subject : Debrief and Reflection after midterm presentation
Attendee : Ila, Chenguang, Phyu, Aniket, Chengaung
Absentee : Siddhant

Agenda

Midterm debrief & take away from others team

- Using existing available market tools is not cool feature/technical complexity.
- Neat UI
- Final UAT must not be close to the final presentation. 10 days and above before final.
- PM – In each nitration, integration, testing and debugging should happen.
- Show the difference between midterm and final (like existing and what they build). **Improvement after midterm.**
- That team did a brave change.

Changes after Midterm

- 1) Clean the codes and commenting first as the first step. – Adapt Java Comment
- 2) User Performance/ Quiz - need to fix the implementation of Hibernate
- 3) CG will be passing the materials Anklet needs to solve his issue.
- 4) Aniket will help CG with GitHub contributor issue by this weekend.
- 5) We will need to sample commenting format.
- 6) Siddhant needs to be 100% impressify.
 - o Research on creative common & MIT license (<https://creativecommons.org/>)
 - o Get license and apply
 - o Contact Barthaz only after we get the license.

Deadline

By Saturday

- Clearing codes and commenting
- Fix user performance/quiz
- Individual schedule
- Analyzing scope and allocation
- Research on open source
- Email to client
