

# Sponsor Testing (WMS) Details

---

Venue: SMU SIS

Date: 8th November 2018

Time: 3.30pm to 4pm

Number of Participants:

- 1 Participant

## Objectives

---

- Gather user feedback on developed user interface for developed functions from sponsors
- Identify potential usability issues
- Ensure that the workout management system makes accessing the database to create, edit and delete workouts and exercises more user friendly and easy to use.

## Scope

---

- Create
- Edit
- Delete

## Procedure

---

We have assigned roles to the team members, which includes:

- A main facilitator, who will facilitate the test with a fixed set of instructions
- A secondary facilitator, to collect feedback at the end of the user testing session
- 2 scribes, who will be recording behaviors and comments from our participants if participants think aloud while testing

No	Goal	Passed/Fail
1	Participants should be able to complete all tasks without guidance from a test facilitator.	Passed
2	Participants should be able to use the wms to access the runkicker database at ease without prior	Passed

	database management knowledge.	
--	--------------------------------	--

## Key Findings

---

Functions	Feedback	Changes
Create/edit/delete	Duration in exercise is not clear and is easily misinterpreted.	Add metric units to define the duration, and include the definition of duration in the user manual.
Edit	User is able to click remove in editing a workout when no exercise is selected, causing the table to be distorted.	Debug to ensure that remove button cannot be clicked unless an exercise is selected.
Edit	User is unsure that he needs to click edit to make changes to the selected exercise, before submitting, to ensure that the workout is edited.	User manual would need to specify the use of the various buttons and the rationale behind the buttons.
