Singpath application

GENShYFT

1. Greet the tester and give a brief explanation of the application. (Refer to Appendix)
2. Ask them to sign the consent form. Assure that those information are strictly kept confidential.
3. Explain the tasks / objectives needed to complete the test.
4. Confirm that tester understands the instructions as shown in the study consent form.
5. Reiterate that the tester can choose not to answer any questions should he/she wishes to.
6. **Obtain tester's consent, in the form of a signature, to the study only after the above points have been completed satisfactorily.**
7. **Begin the test. During the test, team member will observe the tester's reaction. (This process includes taking photos / videos of the test, if the user have given the permission in the consent form)**
8. Conduct feedback session and ask the tester to complete post-test questionnaire.
9. Conduct user feedback session to identify the arrears that might require.
10. Record down the areas of improvement.
11. Thank the user for their time.

Study Script

Welcome to the User Acceptance Test of Singpath by GENShFYT. We are a team of 6 penultimate year SMU SIS students working on our Final Year Project, which is Singpath, the web application you will be given access to shortly. What is Singpath? Well, it is a fun and innovate online platform that allows you to practice programming skills. Answering the world's demand for more individuals with programming skills, we have decided to collaborate with the owner of Singpath to extend the utility of Singpath so as to improve the programming skills of the nation, and eventually, the world.
