Date: 26 Jan 2018

Time: 12.30pm

Venue: SMU SIS 4048

Attendees: Gerald Tan
Bertran Queck
Yeo Yi Xiang
Jamie Chew
Hwee Xian

Notes:	Mid term: 1. More in-depth for speech to text optimization, how it was improved and quantitative measures. 2. Live chat takeover, lack of jms service. Need to build it up. Use telegram as example, ticketing system/ live chat platform not builded from any framework. Talk about why cannot use existing framework and must build on our own. Include more details and limitation. 3. Implementation of gamification. How did you determine best learning experience? By some algo or? What measures you use to determine it helps in the learning outcome? Need some quantitative result to show. 4. tBank Api. What the api has the calling of individual component but it lacks mapping between this individual components. There is a time limitation of the API.Ai. That's why need to have configuration manager. 5. Alpha API. google api is in alpha stage. As we are trying to improve the streaming process, aiming to achieve bidirectional process. Apparently this service is in development face, need to ask on their github. Maybe can combine with google speech mentioned earlier. Need to be more specific on how it is different from the google speech mentioned earlier. 6. Can rank by complexity when presenting and need more information rather than summarized

	7. Is it part of our scope to measure learning before and after? What we want to do is to measure how the app has helped in learning using the pre and post quiz.
	8. Proof of deployment, explain why we want them to work in pair. And tabulate the score in pair.
	9. During demo, supervisor finds that the agg expense view chart is not intuitive when you press the legend is to hide part of the chart.
	10. "Close the quiz" for pretest, what is the purpose?
	11. Is there a way to tell the students if they are in pretest and post test?
	12. How to transit to post test? How to let students know what question they have done and they move from pre to post test? Can add a text message.
	13. What will happen if two person log in it the same account?
	14. Admin live chat, logout, scoreboard, transit to round 2 need to fix.

The meeting was adjourned at 1.30pm. These minutes will be circulated and adopted if there are no amendments reported in the next three days.
