TIME	7pm
VENUE	SIS GSR 2-7
ATTENDEE(S)	Chua Pei Shan, Gwendolin Tan, Ng ZhenYuan, Lim Xin Yi, Shemin Ang Supervisor – Mr. Alan Megargel
ABSENTEE(S)	-

AGENDA	1. Mid-Term Feedback

Topics	Details

Mid-Term Feedback	1. Points to note when during presentation:
	• Qualify why IBM LogicNet Plus is complex. (Example: Cost)
	• Explain why DHL did not use this tool.
	• Prepare a sentence to explain Consolidation and Deconsolidation in business terms and do demonstration first. For example, to reduce two distributors down to one.
	
	2. Improvements to be made after mid-term presentation:
	• Re-evaluate the values for single factor in multiple analysis as the value does not make sense.
	• Team should not use hard coded values.
	• Have an option for managers to choose an existing or new point/location for consolidation. (Team should show the option available during Final Presentation.)
	• For the next User Testing, team should gather functionality feedback as well as usability to validate that the functions that built are useful for them.
	• Utilise Google API for more accurate location to solve the ocean issues. (Consolidate to an area on Land instead of Ocean)
	
	3. Additional Feedback
	• Technical Complexity is good and should be kept.
	• Review on the reviewers' feedback and take that as a hint to improve our project.
	• General Priority:
	   o Complete Deconsolidation
	   o Include Options for managers to consolidate onto an existing marker or a new marker.
	   o Find out ways to Consolidate/Deconsolidate at a green area (Land) instead of blue area (Ocean)
	      ▪ Try using a scan of the grid (image data) to find out what is blue/green.
	      ▪ Research to find a math where we can roughly

	figure out where is the sea.

S/N	Task	Member Responsible	Due Date

The meeting ended at 7.45pm. These minutes will be circulated and adopted if there are no amendments reported on the next three days.
