Please provide your feedback on how we can improve the intuitiveness of the gestures and clarify of our instructions.

Nil   Text of the instruction can be bigger.   Should work on a better background in order to produce a better quality photo.   Nil   Can include trying of clothes too   Less wordy instructions   Maybe if it looks like a doorway or something we may think about walking through it   It is extremely easy to follow the instructions given...I had no problem at all :D   Less pixels, noise background

Please provide your feedback on the scenes and the overall experience with our application

A sharper image of the user would be more attractive for users to use   Really cool.   The scene is not really clear   I did not notice the scenes hade started.   Better graphics   Quite an interesting and novel experience   It happen too fast. Didn't manage to see the stickman :(New experience   The filter can be better fitted   Visuals can be improved. Maybe a cute looking character instead of a stick man.   I was very happy :D   I didn't experience it :(
