IS480 - Final Year Project

Singapore Management University

Date	:	January 22, 2014
Location	:	BP Meeting Room
Subject	:	First meeting (Clarification of projects and concerns)
Attendee	:	Pujara Aniket Pinakin, Gokarn Ila Nitin, Mi Mi Han Kyaw, Phyu Phyu Htant, Peter Morrison, Terence Tan Yeow Khin
Absentee	:	Siddhant KANAUJIA

No.	Agenda
1.	- After clarification, project is allowed to be implemented in Interaction Design and Prototyping course from SMU. - Observed the sample training module that Mr. Morrison showed. - Logo and company colours must be strictly adhered to while implementing the layout of the system. - BP will send us the branding contents or the link to the branding contents as well as non-confidential contents for the prototype, tentatively after Chinese New Year. - The system should creatively crafted as to keep the users focused on their training modules. - The system should be made to run error/bug free on IE9 or later. - Target users work in the IT department. - Will receive some publicly available test data from BP to test the initial UI framework for Interaction Design and Prototyping. Features of the mock up shown today: · Carousels to select courses · What each stakeholder has to say about the particular course. · Quiz- infinite retries · Has to be very interactive
2.	- The software developed must be a web application.

	- Our web portal should be able to upload/modify the training module content. - Can use any software development methodology. (Preferably agile) - Deployment could be made in a public cloud with some access controls. Amazon is preferred over others. - We can explore more about notification and tracking features with IE timestamp (Per course/ user ID) from Mr. Morrison - Meetings can be done once in every two weeks initially. - If the ship is sailing smoothly, meetings could be done once a month. - Our schedule is flexible to accommodate any ad hoc meetings BP might have. - Our team need to provide FYP wiki link to BP to keep track the progress of the project.
