	Tasks	Priority																																							
	Deconsolidation	1																																							
	Help Function of Scenario	2																																							
	Redo Calculation	3																																							
	Tie product to lane	4																																							
	Multi Product Scenario Form	5																																							
	Consolidation (Allow user to select existing marker to consolidate)	6																																							
	Improvement on Multiple Graph	7																																							
	Solve bug for Creation of DC	8																																							
	Pop up enter change to NO	9																																							
	Graph on Information Window 5.1	10																																							
	Scenario Management State Management (Refresh of product management goes to scenario management page)	11																																							
	Search Bar for Scenario Management	12																																							
	Delete Scenario error upon refresh	13																																							
	Standardize Bootstrap Font	14																																							
	Ocean/Land Detection	15																																							
	Rename of markers	16																																							
Uniform table size across different tabs.	17																																								
Loading gif for Consolidation and Deconsolidation	18																																								
Improve location for drag and drop	19																																								
User Testing 3, Validation Test and User Testing 4	<ol style="list-style-type: none"> 1. Validation: Prof and DHL staff 2. User Testing 3: Business OM students (Usability) 3. User Testing 4 is testing for usability only: GTL & Students 																																								

S/N	Task	Member Responsible	Due Date

The meeting ended at 6.06pm. These minutes will be circulated and adopted if there are no amendments reported on the next three days.
