

## Demography of testers

- Both users are already happily married
- Adrian - Groom, Gui Shi's sister in law - Bride
- Adrian - Planned with the help of a wedding planner, Gui Shi's sister in law - With the help of family and friends

## Things that need plannings to be done

- **Wedding Date**
- Budget
- Wedding Bands wedding & ROM Venue
- **Guest list**
- Wedding Songs
- Bridal Package (keeping track of Photo shoots progress – editing )
- Wedding Cards ( E- wedding cards and hard copy with address)
- Guo da Li date ( items to get and relatives house to deliver the card and item )
- **Reminders**
- Schedule list
- Manpower
- Logistics

## Things to do

- Need to indicate current period
- Indicate item that has just been added
- Add Reminder function in Things to do
- Brides & Grooms should always be able to work together in this card
- List items in alphabetical order

## Notes

- List item in option
- List items in alphabetical order
- Wedding tips
  - Too small to read
  - Better to have on another page

## Discover

- Bookmark should not go to notebook, rather should go under Favourites. Or, have a pop up to notify that bookmarked items are added in Notes
- Push from Pinterest
- Hard to notice the objective of colour buttons
- There are too many items on one page
  - Text filter

## Guest List Manager

- Point of contact and I/C instead of helpers

- Helpers will be able to input here as well
- Allocate people depending on whether or not they are coming first
- Colour code for attending or not followed by table allocation
- Add function that could keep track of email address that I already sent invitation to

#### RSVP

- Gets details from the users
- Name and Email should be the only input

#### External Landing Page

- Add Video
- Hard to read logo

#### General

- Have an auto layout similar to Apple
- If Budget card is to be added, have budget spent and category
  - Pre-populate some items
